FINANCIAL ANALYSIS

2025/2026 · 1 Mar 2025 to 31 Aug 2026 · prepared 27 Oct 2026, 22:54

Before these figures are presented

Action	**Money on no budget line**	20,254,000.00	4 transaction(s), 14.8% of everything that moved in this period. It is counted in the book but appears on no line of the Income & Expenditure sheet. *Give the categories behind these rows a budget line, then this figure returns to the sheet.*
Check	**Payroll not yet posted**	2	2 payroll run(s) worth 305,873.00 have not been paid, so no salary appears anywhere in this analysis. *Say so when presenting, or pay and post the runs first — staff cost is missing until you do.*
Check	**Budget matches an exercice**	misaligned	It begins on 1 Mar 2025, before any fiscal year starts. It spans more than one exercice (Exercice 2025, Exercice 2026). Budget against actual reports over the budget's own dates, so asking for either exercice will return the whole period rather than that year alone. *These figures cannot be compared line for line with an exercice's accounts.*
OK	**Entries in the wrong exercice**	0	Every entry is filed under the fiscal year its date falls in.
OK	**Entries with no accounting period**	0	Every entry sits in a month of its own exercice.
OK	**Debits equal credits**	127,414,702.66	The ledger balances.

Who has paid, and who has not

Students billed a First Instalment or Second Installment in this budget year, counted as people rather than as fees: a student with both instalments and one paid is one student who is partly paid. Applicants are counted apart because they are not yet students, and pooling the two would overstate collection. Resit fees, admission fees and everything else are not in these counts - 157 of them, 881,000 billed, 10,000 still owed. They are listed in full under "Collection by fee" below.

Students	66	56	9	1	21,100,000	20,247,333	852,667

Admission fees, counted on their own

People billed an admission fee in this budget year. These are mostly applicants, who are not students yet, so none of these figures form any part of the student figures above.

Fee collection, month by month

Instalment cash received in this budget year, a wider figure than Collected above because it includes instalments billed in earlier years. The last column is all fee cash, instalments and everything else, which is what ties to the money-in figures earlier in this pack.

The same students, one instalment at a time

The cohort table above pools the instalments, so a student who has settled the first and not the second counts there as partly paid. Each row below counts only the students that instalment was billed to and answers "who has paid THIS instalment". The people columns do not add down — the rows describe overlapping groups of different sizes — but the money does, and comes to the student figures above.

INSTALMENT	STUDENTS	FULL	PART	NOTHING	BILLED	COLLECTED	OUTSTANDING	RATE
First Instalment	66	62	2	2	9,900,000	9,473,333	426,667	95.7%
Second Installment	62	56	6	0	11,200,000	10,774,000	426,000	96.2%

Collection by programme

Worst collection rate first. Rate is money collected against money billed, so a small programme can show a poor rate over very little money — read it with the outstanding column. Each student is counted against the programme that billed them, so every row reads: of the students this programme billed, how many have settled it. These counts do not add down to the 66 students above: 11 student(s) hold enrolments in two programmes this year and are counted once under each.

Collection by fee

Every category billed this year, not only the instalments: only the rows marked "Counted" feed the figures above. Counted in fees, not people. Compare each rate against how far through the year that fee falls due.

A note on the totals: 2 fee(s) worth 171,000, of which 150,000 is still outstanding, are attached to enrolments that no longer exist and so belong to no named person. They are in none of the figures above. They are listed on the analysis screen for correction.

Prepared from the Daybook. Every figure here is the same money as the book and the Income & Expenditure sheet, read a different way.
Charts could not be captured for this copy; the tables carry the same figures.
