

What happens when a student graduates from bachelor and wants to do masters (University of Buea)

1. Graduation from Bachelor's

When a student completes a Bachelor's Degree at UB:

- Their academic record (all courses, grades, GPA, and credits) is finalized and archived in the university's Student Records System.
- A transcript and degree certificate are prepared.

This record remains permanently in the system.

2. Applying for a Master's Program

The student applies as a new student, even if they graduated from UB.

They submit:

- Bachelor's transcript
- Degree certificate
- Application form
- Reference letters

The system links their new postgraduate record to their prior undergraduate identity.

3. New Matricule for Master's

A new matricule is issued.

Example:

- Undergraduate: UBa21A/FS/CS/0021
- Master's: UBa25M/FS/CS/0007

"M" indicates Master's, and numbering restarts for postgraduate studies.

4. System Record Management

UB keeps separate but linked records for Bachelor, Master, and PhD.

Each level has its own transcript, CGPA, and degree record.

Personal data remains consistent.

5. Transcript and Verification

The records office can generate undergraduate and postgraduate transcripts independently.

Summary Table:

Stage | Matricule Example | Record Type | Managed By

Bachelor's | UBa21A/FS/CS/0021 | Undergraduate Record | Registrar's Office

Master's | UBa25M/FS/CS/0007 | Postgraduate Record | Postgraduate School

PhD | UBa28D/FS/CS/0003 | Doctoral Record | Graduate School
